The Sri Sathya Sai Village Integration Programme (VIP) promotes Holistic Village development through Educare, Medicare & Sociocare. Sri Sathya Sai Seva Organisation has been carrying out various activities and projects in these cluster of Adivasi Villagers since past 5 years, where there were no basic amenities like Water & Electricity. A Water Project was commissioned in Burujwadi in 2005 & since then supported by continual visits of volunteers a number of medical camps, educational & vocational guidance programmes have been conducted which has led to a remarkable transformation in the lives of the villagers. To further enhance and enrich the lives of these poor Adivasi Villagers we propose to build a community centre, which will cater to these cluster of villages & will act as the focal point for:

**1. Vocational Guidance and Training Centre:** We intend to start Agricultural Education, Tailoring Classes for Women, Basic Computer Training Courses for Village Youth, Aggarbati, Candle, Papad & Pickle making & several such courses to provide sustainable mode of income for village families by forming self help groups.

**2. Medical Center:** It will house a OPD dispensary with Medicine & Doctors visiting the centre on regular basis to provide free health care for Adivasi Villages. Currently there is no basic medical facility near the village. Villagers have to travel almost 10 Kms to get basic medical treatment.

**3. Sociocare:** This centre will be used by the villagers to celebrate all their traditional festivals, marriages, functions & conduct their Gram Panchayat Meetings etc. One part of the hall will also serve as school for the village children.
